Art Unit: 1714

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5, 7-11, 24-27 and 29-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schilling in view of Gay et al.

Schilling discloses bituminous emulsions comprising bitumen, reaction products of polyamines and rosin and, optionally polymer latex (see abstract and column 10, lines 20-23).

The primary reference fails to recite applicants claimed styrene polymers.

The reference to Gay et al, however, teaches that SBS latex is suitably added to bitumen emulsions for adhesive effects(see claim 4).

It would have been obvious to one of ordinary skill in the art to incorporate the SBS lattices of the secondary reference into the emulsions of the primary reference when the art known benefits were desired.

Claims 6 and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 12-23 are allowed.

The references lined through on applicant's IDS have not been received by the examiner.
